Office Action Summary

Art Unit: 1617

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-3, 14, 15, 19, 28-31 are rejected under 35 U.S.C. 102(a) as being anticipated by WO 97/19,676 (WO '676).

WO '676 teaches an emulsion comprising a poly lactide CO-Glycolide polymer in ethyl acetate to which is added a biologically active peptide in aqueous solution (Example 9, column 4 lines 43-45, column 5 lines 3-12). The citations are to US patent 6,294,204, provided as the equivalent in English of WO '679).

Applicants now claim 0.1-3 g/ml polymer in organic solvent. However, example 4 discloses 3g of polymer in 29 ml which exceeds applicants' lower range. Intended uses in composition claims are not patentable limitations during prosecution before the USPTO.

No claims allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any
